Dear Mr. Good:

Enclosed please find ^1H MAS NMR spectra of sample 080304BLP1, obtained on the 270 instrument. Data were collected at two different spinning speeds, as usual.

In the ^1H MAS NMR spectra two unusual signals are observed, at -4.1 and -4.5 ppm. The only compounds known to have chemical shifts in this region are transition metal hydrides, in particular Mg_2NiH_4 . Elemental analysis (Galbraith Laboratories, Inc., Knoxville, TN) shows that Mg and Ni are not detected in this sample, and that K is the main metal present. Earlier NMR data has shown that the hydride of K appears at about 1.0 ppm. Therefore these results suggest that the signals at -4.1 and -4.5 ppm represent a novel species, and do not correspond to a known metal hydride.

The ASCII x,y format files of these data are also enclosed.

The sample is being returned under separate cover.

Please feel free to call me if you have any questions.

Sincerely,

Gary L. Turner

President

Spectral Data Services, Inc.

RESPONSE TO OFFICE ACTION

Commissioner of Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Applicant files this paper in response to the Office Action mailed February 11, 2004. Also enclosed is a Petition for a three-month extension together with the appropriate fee.

Reconsideration and allowance of the subject application are respectfully requested.

Claims 17-300 are pending in the present application.

Submitted with this Response is new, non-cumulative scientific evidence further demonstrating the existence of lower energy states of hydrogen in many different ways, including, but not limited to, studies of spectroscopic lines, energy output, compositions of matter, generated plasmas, and inverted hydrogen populations. Applicant also identifies the independent third-party data pursuant to the PTO's agreement, which evidence resulted in verbal confirmation of allowability of two copending BlackLight applications handled by Examiner Langel before he was forced to resign from the cases "for moral and ethical reasons," as explained below.
